

ExplorIR[®]

EVALUATION KIT

- Simple to use CO₂ sensor evaluation kit
- Real-time recordings of CO₂ measurements
- Full configuration control using PC software

About the Sensor Evaluation Kits

The evaluation kit enables users to easily assess the performance of a GSS ExplorIR[®] CO₂ sensor. The evaluation kit comes with software that allows the user to control and configure the sensor.

The sensor can be used in its default mode or setup specifically to replicate the final application configuration.

The sensor must be connected to a PC via the USB port. A USB cable is provided as part of the evaluation kit. The evaluation software allows users to stream real time CO₂ measurements to the PC. The data can be recorded with a time stamp for subsequent analysis.

In the Kit

- CO₂ Sensor of Choice
- USB to Sensor Cable
- Protective Case

Ordering Information

- Add EVALKIT prefix to the sensor product code to specify the correct evaluation kit
