

## **Gas Sensing Solutions Website Becomes Multilingual**

### **Pioneers in Solid-State NDIR Infra-Red Gas Sensors Release Major Upgrade to New Website, Giving Customers the Option to View Content in Chinese, Japanese, Korean and English!**

**15 December 2021 - Cumbernauld, UK:** Gas Sensing Solutions - a pioneer in solid state NDIR infra-red gas sensors has added a multilingual option to its website. Following on from the launch of its brand-new website earlier this year, this major upgrade now offers customers the option to view the website in Chinese, Japanese and Korean, as well as the English version.

Selecting a language is easy with the new options added to the menu bar. Users can expect to find key pages available in multiple languages, including the product selection guide, individual product pages, technology, company, and contact information.

Julian Hayes, CEO of Gas Sensing Solutions commenting on the new web site said, “as a global company, it is important to make it easy for all customers to find and select the right product for their application. Over the last 18 months, we have improved our digital presence with a complete overhaul of the company website and adding a multilingual option provides a positive user experience for more of our customers, especially those in Asia with this upgrade.”

To experience the GSS website in a variety of languages, please visit [www.gassensing.co.uk](http://www.gassensing.co.uk).

## **About GSS**

Headquartered in the UK, Gas Sensing Solutions is a global leader in solid state Non-Dispersive Infra-Red (NDIR) LED based gas sensors. Uniquely, the LEDs and companion photo-detectors are manufactured in-house on molecular beam epitaxy (MBE) machines and used in all its patented NDIR diffusion CO<sub>2</sub> sensors.

GSS design, develops and manufactures a wide range of solid state NDIR CO<sub>2</sub> gas sensors, providing innovative products to the world's leading OEMs where low power, high accuracy and high-speed measuring capability are required. GSS has world-wide representation, selling into a wide range of markets including indoor air quality monitoring systems, health care, aerospace, food monitoring and personal safety equipment.
