About the EvaluatIR-A

The EvaluatIR-A evaluation kit provides users with a convenient way to evaluate the GSS CozIR®-A CO_2 sensor in an easy-to-use battery-powered package. Inside, the CozIR®-A sensor uses patented NDIR solid-state LED optical technology to deliver consistent and accurate CO_2 measurements.
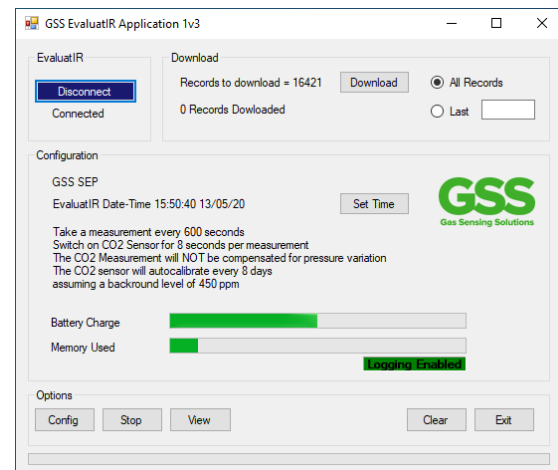

The EvaluatIR-A evaluation kit measures and records CO_2 over a 0-1% range as well as relative humidity, temperature, and barometric pressure. The evaluation kit connects to a PC via a USB port and includes software that allows the user to download the recorded data, in a format suitable for import into Excel or other data analysis tools. All recorded data is time-stamped allowing users to easily analyse CO_2 sensor behaviour. The evaluation kit will operate for up to 12 months on 2 x AA batteries (not included).
